

KORTE® Spitters

Prefabricated water drips, drip strips, and water spouts for vertical surfaces

The more unobstructed the flow of water on a facade, the lower the risk of dirt on the facade and penetration of moisture into components. But the facade contains some “tricky” details that could lead to damage.

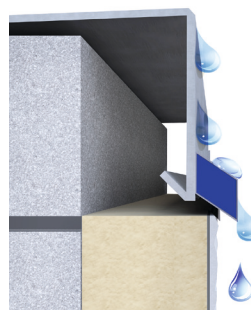

Problem

Attic sheet
does not project beyond
subsequently fitted ETICS
Water penetrates the ETICS

**Dirt on and damage to
components and facade**

Solution

**KORTE®
Spitter**

Type A

**Ceiling shear crack and
shear crack in facade.**
Draining water penetrates
the component

**Dirt on and damage to
components and facade**

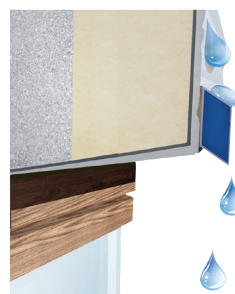

**KORTE®
Spitter**

Type A

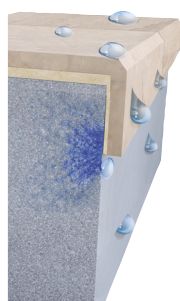

Incorrect gradient in the
window reveal after installation
of ETICS. Water runs over
window

**Dirt and caustic corrosion
of glass**

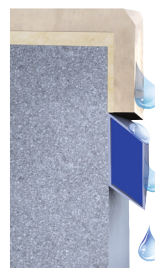

**KORTE®
Spitter**

Type A

Angle tile incorrectly laid:
No spacing.
Water runs around tile end:
Corrosion

Dirt and flaking

**KORTE®
Spitter**

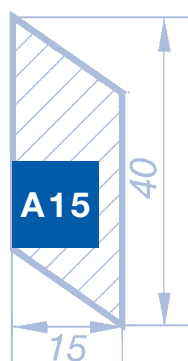

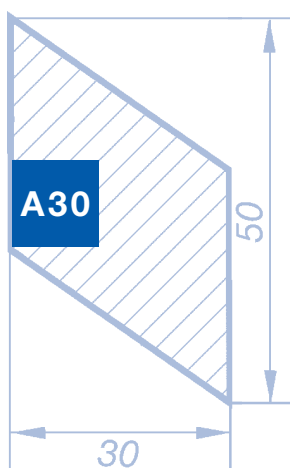

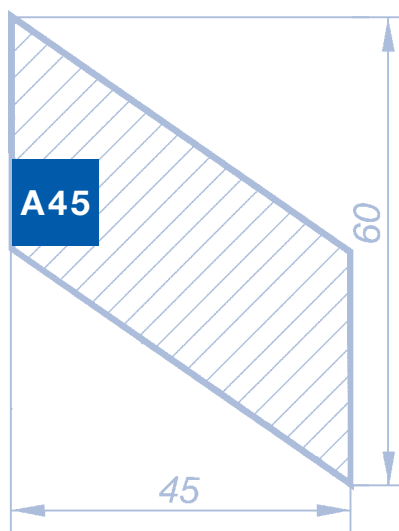

Type A

KORTE® Spitters

Prefabricated water drips, drip strips, and water spouts **for vertical surfaces**

KORTE®

Spitter types

KORTE®-Spitters

Advantages to you at a glance

- **Avoidance** of dirt on the facade
- **Prevention** of caustic corrosion of glass
- **Prevention** of dust deposits
- Water drips off at the **right** point
- Industrially prefabricated from polymer resin
“made in Germany” with consistently high quality
- **Very light** due to approx. 25% void content (density approx. 600 kg / m³)
- **Fire class B1** – fire-retardant
- On any substrate, simply take a suitable adhesive and **glue – prime – coat – done!**
- Problem-free transport and handling thanks to practical dimension (1.20 m length/piece)
- Three different widths available for an exact fit when applying and bridging
